SINGLE VISION LENSES		LENS TINTS/COATINGS (circle your choices)	
Single Vision: Polycarbonate	\$80	#1 Light Tint: Solid or Gradient (Circle One)	\$15
Single Vision Hi Index 1.60 (thinner)	\$125	#2 Medium Tint: Solid or Gradient (Circle One)	\$15
Single Vision Hi Index 1.67 (thinnest)	\$175	#3 Dark Sun glass Tint	\$15
BIFOCAL LENSES – 28mm is the standard bifocal width, 35mm is for those who spend > 50% computer use or reading.		Circle your tint color choice: GRY BRN ROSE	
Bifocal 28mm – Polycarbonate	\$125	Transitions™ (darkens in sunlight like a sunglass, then lightens up when inside or at night) Transition time approx. 90 seconds.	
Bifocal 28mm – HIGH INDEX 1.60	\$165	Circle your transition color choice: GRY BRN	\$70
Bifocal 35mm – Polycarbonate	\$135	Polarized lenses – The best sun glass money can buy. Lenses filter out glare to provide crisp, clear vision when in bright conditions. Ideal for any glare environment (sun, snow, water, etc.)	\$70
Trifocal 28mm – Polycarbonate	\$170	Anti Reflective (AR) Coating – We recommend AR Coating for high plus sphere Rx's (+3.00 and up), and high cylinders (-2.00 and up) and those who have trouble with night driving. Anti Glare will improve any lens (clear, transitions, polarized) because we coat both sides of the lens in a multi step process. AR coating also minimizes the bottle effect for high plus rx's, or the small snake eye effect on high minus rx's. Your eyes appear normal size with AR coating.	\$60
Trifocal 35mm – Polycarbonate	\$170		
PROGRESSIVE LENSES (no line bifocal)			
Standard Progressive – Polycarbonate	\$170		
Premium Progressive – Polycarbonate (provides wider reading/close up vision channel)	\$210		
Standard Progressive Hi Index 1.60	\$215		
Premium Progressive Hi Index 1.60	\$255		
Premium Progressive Hi Index 1.67 (wide reading channel, thinnest lens)	\$305		
Note: We strongly recommend the premium & Hi index progressive lens for all wearers, especially high "plus" Rx's, heavy computer users or readers. The premium provides more close-up reading area, and provides the best optics.			

Fill in charges from above table	\$	Please write any comments here
Base Lens amount from above		
Lens Tint – Add \$15		
Transitions – Add \$70
