CLEANING & HANDLING INSTRUCTIONS

Your radiation protective eyewear features exclusive SF6HT leaded glass and is designed specifically for application in the medical field. Handle your lenses and eyewear with care. Avoid lens contact with acidic or alkali substances and store your eyewear in the protective case when not in use. Your leaded glass eyewear can be cleaned soaked in alcohol for ten minutes and rinsed with water. Cleaning your leaded glass eyewear with commercial solvents may damage the lens and frame.

SafeVision leaded glass eyewear is designed for professional radiation protection use only. It is not intended for any sport, hobby or potentially high impact activity. Serious injury could result from wearing leaded glass lenses in an impact environment.

IMPORTANT: Please ensure your Pupil Distance (PD) figure is on your prescription, it is necessary for all orders. If you do not think it is, call your eyeglass store & get the number via phone, then write it on the prescription for us.

Additional cost for prescriptions with Prism, sphere >6, & cylinder >2. We will contact you if this applies.
